Dear Hiring Manager,

I am writing to express my interest in the Operational Technology Telecoms role. With over 12 years of experience in network engineering across Nokia, Ericsson, Cisco (TCS), and Wipro, I bring strong expertise in designing, testing, and deploying large-scale data networks within telecom and service provider environments.

I have extensive experience in IP networking, Ethernet, routing protocols, and network performance validation, along with hands-on exposure to transport technologies and infrastructure design. I have worked on end-to-end network solutions, translating business requirements into practical deliverables, and developing automation tools using Python to improve efficiency and reliability.

My background also includes working with fibre-based transport networks, backhaul systems, and high-availability environments, which aligns well with the requirements of supporting business-critical telecoms systems. I am particularly interested in this role as it offers the opportunity to contribute to critical infrastructure and expand into OT and SCADA-based network environments.

I would welcome the opportunity to discuss how my experience can contribute to your team.

Thank you for your time and consideration.

Yours sincerely,

Akash Sachdeva
