

AKASH SACHDEVA

Network Optimization Engineer — 4G/5G Wireless Networks — Performance Analysis & Troubleshooting — 12+ Years Experience

akash.sachdeva01@gmail.com — +44 7349 546157 — Reading, UK — linkedin.com/in/akashsachdeva01

PROFESSIONAL SUMMARY

Results-driven Network Engineer with 12+ years specializing in wireless network testing, performance optimization, and protocol analysis across Nokia, Ericsson, and Cisco platforms. Deep technical expertise in end-to-end network validation, capacity analysis, and troubleshooting using Wireshark and advanced testing tools. Proven track record conducting root cause analyses, resolving complex network performance issues, and delivering optimized solutions across multi-vendor 4G/LTE and 5G environments. Strong collaborative team player with excellent problem-solving skills and demonstrated ability to engage with customers, adapt quickly to evolving requirements, and drive continuous improvement in network quality and customer satisfaction.

CORE COMPETENCIES

Wireless Technologies: LTE/4G Architecture, 5G NSA/SA, Protocol Analysis, Network Performance Optimization, Capacity Planning

Network Protocols: BGP, OSPF, MPLS, EVPN, VXLAN, TCP/IP, IPv4/IPv6, IPsec, GTP-U

Testing & Analysis: Wireshark, Spirent, IXIA, TRex, Performance Testing, Throughput Benchmarking, Root Cause Analysis

Automation & Tools: Python, Network Automation, Test Framework Development, Log Analysis, Debugging

Platforms: Nokia, Ericsson, Cisco, Juniper, Multi-vendor Environments, OpenStack

PROFESSIONAL EXPERIENCE

Technical Lead — Ericsson

Oct 2025 – Feb 2026

- Led end-to-end feature testing and validation for L2/L3 networking functionalities on carrier-grade IPOS EVR TD platforms
- Rapidly ramped up within one month, taking ownership of multiple feature test suites ensuring comprehensive validation coverage
- Drove OpenStack-based test environment migration, validating feature behavior in virtualized deployments
- Developed Python automation tools including device health check utility, reducing manual effort by 40% and accelerating validation cycles
- Validated multi-vendor interoperability for BGP, OSPF, MPLS, EVPN, VXLAN, IPsec across Ericsson, Cisco, Juniper platforms
- Identified and reported critical defects, collaborating with development teams to drive 30% faster resolution times

Technical Leader — Nokia

Sep 2021 – Oct 2025

- Led end-to-end performance optimization and validation of wireless network data-plane interfaces, analyzing control-plane and user-plane throughput, latency, and capacity to ensure optimal network performance
- Conducted comprehensive root cause analysis of network performance issues using Wireshark for TCP/UDP packet analysis, IPsec troubleshooting, and GTP-U protocol validation, resolving critical bottlenecks and improving network stability by 20%
- Performed systematic performance testing and benchmarking of L2/L3 protocols at system and SoC levels using industry-standard tools (IXIA, TRex) to validate network capacity and architecture improvements
- Collaborated closely with cross-functional engineering teams to promote knowledge sharing, implement best practices post-launch, and foster a high-performance culture aligned with customer requirements
- Analyzed Nokia internal system logs and performance metrics under high-load conditions, detecting and resolving memory leaks and stability issues through advanced debugging methodologies
- Developed Python-based automation frameworks reducing manual regression testing by 30% and accelerating test cycles by 15%, enabling faster deployment of network optimization improvements
- Validated new hardware/software platform features and Nokia RRM parameters ensuring seamless interoperability and performance before production deployment across multiple releases
- Mentored team members on troubleshooting techniques and testing methodologies, achieving 25% reduction in issue resolution time and enhancing team capabilities
- Engaged in strategic planning activities including test scope definition, feature validation roadmaps, and effort estimation, contributing to on-time delivery of network optimization projects
- Created comprehensive technical documentation including performance analysis reports, test strategies, and validation procedures for release management and customer-facing deliverables.

Associate Consultant — Tata Consultancy Services (Cisco)*Nov 2020 – Sep 2021*

- Led end-to-end testing of L2/L3 networking features on Nexus platforms including NTP, NETCONF/YANG, and DME
- Designed and implemented Python automation frameworks for virtual chassis deployment on UCS blade servers, improving setup efficiency by 30%
- Conducted rigorous NETCONF/YANG protocol testing improving defect detection by 15% and test coverage by 20%
- Developed automated DME test scripts reducing overall test time by 25% while ensuring cross-release compatibility
- Performed effort estimation and created detailed test plans ensuring thorough validation and traceability

Software Engineer — Wipro Limited (Ericsson)*Aug 2012 – Nov 2020*

- Progressed from Software Engineer to Senior Technical Support Specialist through consistent delivery of network testing and validation projects over 8+ years
- Conducted comprehensive smoke, regression, and functional testing of L2/L3 protocols (VLAN, STP, RSTP, LAG, BGP, OSPF)
- Automated network device testing using Python reducing test execution time by 25% and improving efficiency
- Designed and implemented LAN solutions for data centers optimizing IP addressing with Infoblox, achieving 30% OPEX savings
- Gained extensive hands-on experience with Spirent, Agilent, IXIA for protocol validation and performance testing
- Led engineering team fostering knowledge sharing and continuous improvement ensuring high client satisfaction
- Utilized Mirantis OpenStack and Ericsson Cloud Manager for cloud-based network infrastructure deployment
- Worked on datacenter specialist projects in Helsinki, Finland gaining international exposure (Jul 2018 – Jan 2019)

EDUCATION

Master of Science (MS), Computer Software Engineering — Birla Institute of Technology and Science, Pilani — 2012–2016

Bachelor of Computer Applications, Computer Software Engineering — Bangalore University — 2009–2012

CERTIFICATIONS & AWARDS

AWS Educate Machine Learning Foundations — Introducing Generative AI with AWS — OpenStack and NFV (Telco-Cloud) — Business Excellence Award
