Hiring Manager
Nokia UK Limited

Subject: Application for Network Optimization Engineer

Dear Hiring Manager,

I am writing to express my strong interest in the Network Optimization Engineer position at Nokia UK. With over 12 years of experience in wireless networks, performance optimization, and protocol analysis across multi-vendor environments, I bring a proven ability to enhance network performance, troubleshoot complex issues, and deliver high-quality solutions aligned with customer expectations.

In my recent role as Technical Leader at Nokia, I led end-to-end performance optimization and validation of 4G and 5G networks, focusing on user-plane and control-plane throughput, latency, and capacity. I have extensive hands-on experience in root cause analysis using Wireshark, TCP/UDP packet inspection, and GTP-U/IPSec troubleshooting, which has enabled me to identify bottlenecks and improve network stability by up to 20%. My work also involved analyzing system logs, benchmarking performance, and validating features across releases to ensure optimal network behavior.

I have a strong understanding of LTE and 5G architectures (NSA/SA), along with experience in RRM validation, capacity benchmarking, and performance tuning. My background includes working closely with cross-functional teams to implement best practices post-launch and drive continuous improvement—aligning closely with the responsibilities outlined in this role.

Additionally, I have demonstrated success in automation by developing Python-based frameworks that reduced regression testing efforts by 30% and accelerated validation cycles. My ability to quickly adapt, collaborate, and mentor team members has consistently contributed to high-performing teams and improved delivery timelines.

Beyond technical expertise, I am comfortable engaging directly with customers, explaining complex network behaviors, and providing consultative insights to improve network quality and user experience. My exposure to multi-vendor environments (Nokia, Ericsson, Cisco, and Juniper) further strengthens my ability to contribute effectively in diverse and dynamic settings.

I am particularly excited about this opportunity at Nokia, as it aligns perfectly with my experience in network optimization and my passion for improving wireless network performance at scale. I am eager to contribute to your team and support Nokia's mission of delivering high-quality connectivity solutions.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience align with your requirements.

Kind regards,
Akash Sachdeva
