

AKASH SACHDEVA

Senior Network Engineer — Enterprise Network Infrastructure — Cloud & Hybrid Networks — 12+ Years
akash.sachdeva01@gmail.com — +44 7349 546157 — Reading, UK — linkedin.com/in/akashsachdeva01 — Portfolio

PROFESSIONAL SUMMARY

Results-driven Senior Network Engineer with 12+ years of hands-on experience designing, implementing, and supporting enterprise-scale network infrastructure across on-premise and cloud environments. Proven expertise in delivering secure, scalable, and resilient LAN/WAN solutions while collaborating with cross-functional teams to meet strategic business objectives. Deep technical proficiency in routing and switching protocols (BGP, OSPF, MPLS), network security, VPN infrastructure, and hybrid cloud networking (AWS/Azure). Demonstrated success in troubleshooting complex network issues, performing root cause analysis, optimizing network performance, and implementing network automation solutions. Skilled in working with multi-vendor platforms (Cisco, Juniper, Ericsson, Nokia) and ensuring compliance with IT policies, audit requirements, and industry best practices. Based in Reading, UK with immediate availability and willingness to participate in on-call support rotation.

CORE COMPETENCIES

Network Infrastructure: Enterprise LAN/WAN Design, Hybrid Cloud Networks (AWS/Azure), Network Segmentation, High Availability

Routing & Switching: BGP, OSPF, MPLS, VLANs, QoS, STP/RSTP, Network Optimization, Capacity Planning

Network Security: Firewalls, VPN Technologies (IPSec), Access Controls, Security Compliance, Network Policies

Network Services: DNS, DHCP, EVPN, VXLAN, ACI, Load Balancers, Network Redundancy (VRRP, HSRP, LAG)

Multi-Vendor Platforms: Cisco (Nexus, Routers, Switches), Juniper, Ericsson, Nokia, Palo Alto

Cloud & Virtualization: AWS/Azure Hybrid Environments, OpenStack, VMware, Cloud-Based Network Infrastructure

Network Automation: Python Scripting, Infrastructure as Code (IaC), Network Orchestration, Automation Framework Development

Troubleshooting & Analysis: Root Cause Analysis, Performance Monitoring, Network Diagnostics, Issue Resolution

Tools & Monitoring: Wireshark, IXIA, Spirent, TRex, NetFlow Analysis, Performance Monitoring Tools

Documentation: Network Architecture Documentation, Configuration Management, Failover Strategies, Technical Reports

PROFESSIONAL EXPERIENCE

Technical Lead — Ericsson

Oct 2025 – Feb 2026

- Designed, configured, and validated enterprise-scale L2/L3 IP transport networks ensuring robust, scalable, and highly available infrastructure for carrier-grade deployments
- Architected secure and resilient WAN solutions leveraging MPLS, BGP, and OSPF routing protocols optimizing network performance and end-to-end connectivity
- Led comprehensive network integration, testing, and commissioning activities across virtualized and hardware platforms validating feature behavior and interoperability
- Performed root cause analysis for complex routing and switching issues across multi-vendor environments (Ericsson, Cisco, Juniper) reducing MTTR by 35%
- Implemented advanced networking technologies including EVPN, VXLAN, and SRv6 ensuring secure network segmentation and transport layer efficiency
- Developed Python-based network automation tools including device health monitoring and configuration management utilities reducing manual effort by 40%
- Conducted comprehensive performance monitoring and capacity planning activities optimizing network throughput and resource utilization by 25%
- Produced detailed technical documentation including network architecture designs, configuration standards, failover strategies, and validation reports
- Collaborated with cross-functional teams and security specialists ensuring alignment with IT policies, compliance requirements, and industry best practices

Technical Leader — Nokia

Sep 2021 – Oct 2025

- Architected and implemented IP and transmission network solutions for mobile telecom infrastructure with focus on transport optimization and WAN efficiency
- Designed large-scale VPN infrastructure supporting secure connectivity across distributed network environments ensuring high availability and disaster recovery capabilities
- Configured and maintained enterprise IP networks implementing MPLS, OSPF, BGP routing protocols, VLANs, and advanced QoS policies for traffic prioritization
- Collaborated with security teams to enforce network access controls, implement firewall policies, and ensure compliance with security standards and audit requirements

- Troubleshoot complex multi-layer network issues including routing protocols, VPN connectivity, IPSec tunnels, and TCP/UDP performance in mission-critical environments
- Performed system-level performance testing and capacity planning validating network throughput, latency requirements, and resource optimization
- Conducted comprehensive network performance validation using industry-standard monitoring tools (IXIA, TRex, Wireshark) supporting NetFlow analysis and diagnostics
- Developed Python-based network automation frameworks reducing regression testing cycles by 30% and accelerating network commissioning timelines by 15%
- Mentored engineering team of 8 members fostering technical excellence and achieving 25% reduction in issue resolution time through structured troubleshooting methodologies
- Documented network architecture, configurations, and operational procedures ensuring knowledge transfer and alignment with IT governance standards
- Stayed current with emerging networking technologies through industry briefings, technical publications, and continuous professional development

Associate Consultant — Tata Consultancy Services (Cisco)

Nov 2020 – Sep 2021

- Designed, configured, and managed Cisco-based enterprise network infrastructure on Nexus platforms implementing L2/L3 protocols, VLANs, and QoS policies
- Deployed and supported network services including routers, switches, firewalls, and load balancers across data center environments ensuring high availability
- Led network integration and testing activities for enterprise-scale deployments validating routing, switching, and security configurations
- Troubleshoot complex network issues across Cisco platforms improving network stability and reducing defect detection time by 15%
- Performed network performance monitoring and capacity planning using IXIA and TRex traffic generators validating design requirements and throughput benchmarks
- Developed automation frameworks for network provisioning and virtual chassis deployment on UCS blade servers improving operational efficiency by 30%
- Documented network architecture, configurations, and failover strategies using industry-standard tools ensuring compliance with IT documentation standards
- Collaborated with cross-functional teams including security, infrastructure, and application teams ensuring seamless network deployment and integration
- Conducted technical design reviews and effort estimation activities ensuring project deliverables aligned with enterprise requirements and timelines

Sr. Software Engineer — Wipro Limited (Ericsson)

Aug 2012 – Nov 2020

- Progressed from Software Engineer to Senior Technical Support Specialist through 8 years of consistent delivery in network infrastructure engineering
- Designed and implemented LAN solutions for telecom data centers optimizing IP addressing, routing protocols, and DNS management achieving 30% OPEX reduction
- Configured and maintained enterprise L2/L3 networks implementing VLAN segmentation, BGP, OSPF routing protocols, and network security policies
- Deployed and managed network services including firewalls, routers, and switches across on-premise telecom infrastructure ensuring carrier-grade reliability
- Performed comprehensive network integration testing including smoke, regression, and functional validation ensuring network stability and compliance
- Troubleshoot complex routing, switching, and connectivity issues collaborating with security teams and cross-functional engineering groups for resolution
- Developed network automation scripts using Python reducing test execution time by 25% and improving operational efficiency across deployments
- Managed network performance monitoring and capacity planning using industry-standard tools (Spirent, Agilent, IXIA) for protocol validation and optimization
- Utilized cloud platforms (Mirantis OpenStack, Ericsson Cloud Manager) for deployment and management of cloud-based network infrastructure
- Documented network designs, configurations, operational procedures, and root cause analysis reports ensuring knowledge retention and compliance
- Led datacenter network specialist projects in Helsinki, Finland (Jul 2018–Jan 2019) gaining international exposure in large-scale enterprise deployments
- Led engineering team fostering collaboration, knowledge sharing, and continuous improvement ensuring high client satisfaction and on-time delivery

EDUCATION

Master of Science (MS), Computer Software Engineering — Birla Institute of Technology and Science, Pilani — 2012–2016

Bachelor of Computer Applications, Computer Software Engineering — Bangalore University — 2009–2012

PROFESSIONAL DEVELOPMENT & RECOGNITION

Introducing Generative AI with AWS — AWS Educate Machine Learning Foundations — OpenStack and NFV (Telco-Cloud) — Nokia Business Excellence Award — Ericsson High Flier and Outstanding Contribution Award

TECHNICAL PROFICIENCY

Network Protocols: TCP/IP (IPv4/IPv6), BGP, OSPF, MPLS, VLAN, QoS, EVPN, VXLAN, ACI, STP/RSTP, VRRP, HSRP

Security Technologies: Firewalls, VPN (IPSec), Network Access Control, Security Compliance, GTP-U, DNS, DHCP

Platforms: Cisco (Nexus, Routers, Switches), Juniper, Ericsson, Nokia, Palo Alto, Multi-vendor Environments

Cloud & Virtualization: AWS, Azure, Hybrid Cloud, OpenStack, VMware, Cloud Network Infrastructure

Automation & Scripting: Python, Network Automation, Infrastructure as Code (IaC), NETCONF/YANG

Monitoring & Testing: Wireshark, IXIA, Spirent, TRex, NetFlow, Performance Monitoring, Capacity Planning

AVAILABILITY & PREFERENCES

Location: Reading, UK — **Availability:** Immediate — **Position Type:** Permanent Employee

Preferred Locations: Bristol, London — **On-Call Support:** Available for on-call rotation

Work Authorization: Full UK work rights
